

NAME	:	Example Report
AGE : 45	SEX:	Male
ETHNICITY/RACE	:	Caucasian
EDUCATION/GRADE	:	H.S. Graduate
DOB	:	11/15/1963
MARITAL STATUS	:	Single
DATE ADMINISTERED	:	09/18/2009
CURRENT ARREST	:	05/29/2009

TWO TRUTHFULNESS SCALES

The Sex-Item Truthfulness Scale measures client truthfulness while the offender answers sex-related questions. The Sex-Item Profile follows.

----- INCEST CLASSIFICATION: admitted to 1 out of 3 incest items -----

A REMINDER: Elevated (70th percentile and higher) scale scores are indicative of problematic behavior. As scale scores increase the client's problematic behaviors become more problematic and severe.

SEX SCALE PARAGRAPHS

SEXUAL ADJUSTMENT SCALE SCALE SCORE: 74
 This person's Sexual Adjustment Scale score is in the Problem (70 to 89th percentile) range. Sexual Adjustment problems and concerns are present. Admission items include: # 110, 144, 190. Sex adjustment problems and concerns interact with other elevated (70th percentile and higher) sex-item scale scores. This client manifests sexual adjustment concerns. Individual (or group) outpatient sex adjustment counseling may be warranted.

CHILD MOLEST SCALE SCALE SCORE: 45
 This client's Child Molest (Pedophile) Scale score is in the Medium Risk (40 to 69th percentile) range. Few, if any, indicators of child molestation are evident. However, all child molester assessments should include reviewing their SAI Sex-Item Truthfulness Scale score, available history and any prior evaluations. Medium risk scorers do not present as pedophiles. The least restrictive disposition consistent with public safety is recommended.

SEXUAL ASSAULT SCALE SCALE SCORE: 75
 This individual's Sexual Assault (Rape) Scale score is in the Problem (70 to 89th percentile) range. Problem risk scorers have a higher than average probability of committing rape. Admission items include: # 95, 204. Recommendation: review client's court records, treatment history, prior evaluations and any other elevated SAI scale scores. Recommendation: outpatient (individual or group) counseling or psychotherapy might be considered.

EXHIBITIONISM SCALE SCALE SCORE: 29
 This person's Exhibitionism Scale score is in the Low Risk (zero to 39th percentile) range. Low risk scorers do not intentionally expose their sex organs (genitals) to unsuspecting strangers. An essential feature of this disorder is recurrent, intense sexual urges and fantasies. This person's Exhibitionism Scale score is in the Low Risk

range. This individual is not an exhibitionist, consequently a counseling or treatment recommendation is not offered.

NON-SEX-ITEM SCALES

NON-SEX SCALE PARAGRAPHS

VIOLENCE SCALE

SCALE SCORE:77

This client's Violence Scale score is in the Problem (70 to 89th percentile) range. A violence pattern is indicated. Admission items include: # 20, 44, 56. Recommendation: This person can be violent, consequently any other elevated (70th percentile or higher) SAI scale scores would be problematic. Individual or group counseling that focuses upon positive alternatives to the frustration-anger-violence cycle should be considered. Treatment intensity should match violence severity.

ANTISOCIAL SCALE

SCALE SCORE:38

This person's Antisocial Scale score is the Low Risk (zero to 39th percentile) range. Few, if any, indicators of deceit, repeated lying, chronic inability to conform to society or antisocial thinking are present. Low risk scorers typically manifest stability, loyalty, responsibility and a relatively trouble free adjustment. However, review the Test Item Truthfulness Scale score to clarify client truthfulness when tested.

DISTRESS SCALE

SCALE SCORE:78

This individual's Distress Scale score is in the Problem (70 to 89th percentile) range. This person is experiencing problematic distress. Admission items include: # 10, 34, 46. Suicidal thinking (#156 or 217) was not admitted. Treatment (counseling) intensity should match the severity of distress intensity. Individual or group outpatient counseling might be considered. This person is troubled and concerned. Recommendation: stress management counseling. This score did not occur by chance.

IMPULSIVENESS SCALE

SCALE SCORE:47

This client's Impulsiveness Scale score is in the Medium Risk (40 to 69th percentile) range. There has been considerable research on "sexual impulsivity disorders" in the last decade. Some scientists maintain that paraphilia-related disorders may be the more prevalent form of sexual impulsivity. Medium Risk scorers are usually not sexually impulsive individuals. However, other elevated (70th percent-

ile and above) SAI scale scorers (e.g., substance abuse) can influence a person's impulsivity.

ALCOHOL SCALE

SCALE SCORE:82

This client's Alcohol Scale score is in the Problem Risk (70 to 89th percentile) range. Alcohol abuse is indicated. This individual states (item #216) that she is not a recovering alcoholic. Relapse risk is high. Admission items include: # 26, 38, 50, 109. Recommendation: consider chemical dependency (alcohol) treatment augmented with mandatory Alcoholics Anonymous meetings. This person may be in the early stages of alcoholism.

DRUGS SCALE

SCALE SCORE:79

This person's Drugs Scale score is in the Problem (70 to 89th percentile) range. Drug use or abuse is indicated. This client states (item #216) that she is not a recovering drug abuser. Admission items include: # 18, 30, 42, 54. Recommendation: outpatient (individual or group) drug counseling should be considered. Treatment intensity should match drug problem severity. Narcotics Anonymous (NA) or Cocaine Anonymous (CA) meetings might augment - but should not take the place of treatment.

INFORMATION PROVIDED BY CLIENT

Age at first conviction.....	NA	Exhibitionism Arrests.....	0

DATE

SIGNIFICANT ITEMS: each of these answers is a direct admission or unusual answer. These answers give insight into the offender's thinking, motivation and rationalizations. When numerous, significant items may overflow onto a 6th page.

SEXUAL ADJUSTMENT

110. watches pornography
144. Has (had) sex therapy
190. Required to be in sex trtmnt

CHILD MOLEST

17. Sexually excited by youth
29. Sexually aroused by child

SEXUAL ASSAULT

95. Has forced someone to have sex
204. Admits has raped someone

EXHIBITIONISM

45. Aroused: thinks of exposing

ALCOHOL

26. Drinking is a problem
38. Concerned about drinking
50. Alcoholics Anonymous
109. Last year drinking problem

DRUGS

18. Uses marijuana
30. Denies using drugs but does
42. May or may not use drugs
54. Worries about drug use

VIOLENCE

20. Gets angry quickly
44. Often thinks about revenge
56. Two or more items apply

ANTISOCIAL

107. Two or more apply to client

DISTRESS

10. Often lonely and unhappy
34. Often desperate and hopeless
46. Recently very distressed

IMPULSIVENESS

52. Acts on spur of the moment
